

Brandon Gillette, a graduate research assistant at the University of Kansas, is currently working on his PhD in environmental geography using remote sensing with an emphasis in environmental education. He completed his bachelor's and master's degrees from the University of Kansas in earth/space science education. He has worked as a middle and high school science teacher and currently works with the Center for Remote Sensing of Ice Sheets (CReSIS) developing curriculum and teacher professional development. His hobbies include travel, photography, and playing outside!
